POWER OUTAGE PREPAREDNESS CHECKLIST

AccuWeather READY

BROUGHT TO YOU BY DURACELL THE HOME DEPOT

Tips:

- As a rule of thumb, prepare to be without power for up to 72 hours.
- Ensure you have a way to receive warnings – a NOAA weather radio, the AccuWeather app on your phone or the radio/television. Sign up for alert notifications that are specific to your town or region.
- Keep an extra supply of Duracell® batteries that can power flash lights, lanterns, or other home essentials. They're are also handy for powering battery-powered fans if the weather is hot.
- Install carbon monoxide detectors with battery backup in central locations of your home. This will ensure you and your family members will remain protected until the power returns.
- Turn off or disconnect appliances, equipment, or electronics to avoid permanent damage from electrical surges or water flooding. Rely on battery powered devices until the power returns or storm subsides.
- Have a portable and rechargeable battery on hand, like the Duracell® Powerbank, designed with fast charge technology and high capacity to help prolong the battery life of your smartphone or other USB-powered devices.
- Keep extra non-perishable food and bottled water in an easily accessible area.
- Purchase a generator. Not only will this power your fridge and small appliances, you can use it to charge your laptops and tablets.
- Keep a separate supply of pet food and a few treats on hand for your furry friends.
